## Press Release

### Devoteam launches AI Academy in Luxembourg

An initiative supported by Microsoft Luxembourg, Digital Luxembourg and the Ministry of the Civil Service (INAP)

**Luxembourg – June 20th, 2019** – Devoteam launches the first AI Academy in Luxembourg with the support of Microsoft Luxembourg, Digital Luxembourg and the Ministry of the Civil Service (INAP). The AI Academy aims at increasing the competitiveness of Luxembourg as a country, enhancing employability, improving Digital Skills and contributing to build an AI culture within the country.

#### Creating the workforce of tomorrow

Technologies like artificial intelligence require both leadership and technical skills. For any economy today, leading on the challenges of tomorrow will be paramount to get

ahead. The AI Academy aims at tackling the current knowledge and competencies gap by offering a first of its kind course in AI within Luxembourg. This will in turn help organizations to prepare for the challenges of tomorrow whilst also ensuring they are ready to take advantage of the possibilities that AI can bring in the coming years.

Candi Carrera, Country Manager Microsoft Luxembourg, emphasizes *"We have been working since December on this project and are very excited about this initiative as part of our contribution to drive innovation in Luxembourg. This set of courses aims at teaching AI to help people better understand what the challenges of tomorrow will be and to ensure that it will be done in a right and ethical manner."*

### **Luxembourg – leading the way on AI**

The purpose of the AI Academy is to empower students, professionals and even unemployed people by offering them a set of specific trainings. These trainings provide attendees with industry-wide skills, which enables them to respond to the current shortage of AI skills within the Luxembourg market. Furthermore, the AI Academy responds to Luxembourg's digital ambitions to be amongst the most advanced digital societies in the world by focusing on data-driven sustainable economics and human-centric and ethical AI development.

*"We are really proud to open Luxembourg's first AI Academy. Together with Microsoft we now offer a tailored program to better respond to the growing demand in the market. We have the official support from Digital Luxembourg and the Ministry of the Civil Service (INAP) for the AI Academy and are looking forward to start educating the first group of students in September",* said Wilfrid Lagrange, Country Manager Devoteam Luxembourg.

The AI Academy will initially offer three trainings – one for decisions makers and two more tailored for technical people. The business program focuses on business leaders, managers and executives to gain sufficient knowledge to be able to understand, define and implement an AI strategy in their organization.

The "foundation" technical training is designed for people new to AI or professionals that want to stay ahead of technology trends. Finally, the "advanced" technical training certifies attendees with a deeper skillset around AI.

The first AI Academy course will start at the Devoteam Training Center in September and is limited to 16 people. Interested in knowing more about the AI Academy: <https://training.devoteam.lu/catalog/microsoft>

## About Microsoft

Microsoft (Nasdaq "MSFT" @microsoft) enables digital transformation for the era of an intelligent cloud and an intelligent edge. Its mission is to empower every person and every organization on the planet to achieve more.

## About Digital Luxembourg

Digital Luxembourg, founded in 2014, is a multidisciplinary government initiative working with public, private & academic players to harness digitalization for positive transformation. To achieve this goal, it approaches digitalization holistically, focusing on strengthening & future-proofing five key areas: skills, policy, infrastructure, ecosystem & government. Executing the Luxembourg government's digitalization strategy, Digital Luxembourg enables new projects, supports existing ones & boosts the visibility of nationwide efforts.

## About the Ministry of the Civil Service (INAP)

The mission of the Ministry of the Civil Service (INAP) Is to promote vocational training - initial and continuous training - among government personnel as well as among the personnel of the municipalities. The INAP falls under the authority of the Civil Service Minister. Among the INAP's priorities are its management and leadership programme, its human resources programme as well as the Digital Academy. In the area of digital skills, the INAP's activities are based on three components: digital literacy aiming to develop the skills of every civil servant, digital leadership including training programmes for government and the municipalities' senior officials and ICT practitioner skills.
